## EDUCATION

### MPSTME, NMIMS(Mumbai)

Mumbai, India

Bachelors of Technology in Computer Science (Data Science) | GPA- 3.5

July 2023 - Expected July 2027

### Carmel Convent Sr. Sec School

Neemuch, India

Achieved 96% in Class 10 (Secondary Education)

May 2023

Secured 80% in Class 12 (Higher Secondary Education)

JEE Mains (92 percentile)

## SKILLS SUMMARY

- **Languages:** Python, C++, C, SQL, HTML5, JavaScript
- **Framework:** Pandas, Numpy, Matplotlib
- **Tools:** PowerBI, Excel, Tableau, MySQL, PowerPoint, SAS
- **Platforms:** PyCharm, Jupyter Notebook, Visual Studio Code, Streamlit, Figma
- **Soft Skills:** Accounting and Financial management, People Management, Communication Skills

## WORK EXPERIENCE

- Managed event logistics as a member of 4C [NMIMS].
- Organized activities and supervised tasks during community service with children. **(Jun 2024 – Jul 2024)**
  - Volunteer Teacher, Vision Kids School .
  - Led a 3-week educational workshop for students (up to 5th grade), enhancing communication, leadership, and teaching skills.
- Executive member of an Art Club, Mpstme.

## PROJECTS

### Medical Image Detection App | [App link](#)

- Built an AI-powered Streamlit web app for medical image analysis using CNN and Gemini Pro 1.5 API.
- Enabled real-time image upload, analysis, and structured diagnostic reports.
- Output includes detailed findings, highlighted anomalies, and treatment suggestions.
- Planned future enhancements: feedback loop, mobile version, and expanded detection.

### Gold Price Prediction (2025) using Holt-Winters Method

- Forecasted gold prices for 2025 using the Holt-Winters method on historical data (2014-2024).
- Processed and cleaned datasets in Python, storing structured data in Excel for analysis.
- Developed a Power BI dashboard to visualize historical trends and future predictions.
- Output: Predicted an initial price rise in 2025, followed by a potential decline.

### HR Analytics

- Implemented a Power BI dashboard to analyze employee attrition, salary trends, and workforce demographics.
- Visualized attrition patterns by age, job role, salary, and years at the company for strategic HR insights.
- Output: Highest attrition in Life Sciences & Medical fields, ages 26-35, and salaries up to \$5K; declines after 10 years.
- Future scope: Integrate predictive analytics, expand dataset, and develop a real-time web dashboard.

### Notes and Password Manager

- Constructed a C++ Notes and Password Manager with user authentication for secure data storage.
- Enabled notes management (add, edit, delete) and password storage with retrieval functionality.
- Organized project with structured file handling for secure data management.
- Output: Generates and stores notes, passwords, and user data in an "output" folder upon execution.

## CERTIFICATES

### Google Analytics Certification | [Certificate](#)

February 2025

- Proficient in Google Analytics 4 for tracking website performance, data collection, reporting, and business insights.

### Introduction to Figma | [Certificate](#)

February 2025

- Expert in Figma for UI/UX design, including wireframing, prototyping, interactive components, and collaborative design.

### JavaScript: Unlocking the Power of JavaScript | [Certificate](#)

March 2025

- Completed a comprehensive JavaScript course covering core concepts, problem-solving, and practical coding applications.

### Dive Deeper into GA4 Data and Reports | [Certificate](#)

March 2025

- Proficient in GA4 data analysis, reporting, user behavior tracking, event measurement, and insights-driven optimization.
